

Replicant - Issue #1059

Issue # 1065 (Closed): Make sure *we* provide all the corresponding source code.

Find out if it's still possible to get the old images's corresponding source code.

11/08/2014 03:33 PM - Denis 'GNUtoo' Carikli

Device:	Not device specific	Type of work:	
Description			
Old Replicant versions such as 2.2 are not buildable anymore (#291). That might be because: <ul style="list-style-type: none">• It fails to build because the host toolchain changed somehow.• The source code cannot be fetched anymore. In the later case we should either fix it or remove the images. Denis.			
Subtasks:			
Issue # 1077: Verify if Replicant 1.5 is fetchable			Closed
Issue # 1083: Verify if Replicant 2.2 is fetchable			Closed
Issue # 1089: Verify if Replicant 2.3 is fetchable			Closed
Issue # 1095: Verify if Replicant 4.0 is fetchable			Closed

History

#1 - 11/08/2014 03:38 PM - Denis 'GNUtoo' Carikli

- Parent task set to #1065

#2 - 11/08/2014 04:00 PM - Denis 'GNUtoo' Carikli

- We don't provide Replicant 1.5 images.
- The first Replicant 2.2 image has the corresponding git hashes:
http://ftp.osuosl.org/pub/replicant/images/replicant-2.2/preview/0001/git_versions.txt
So, since this image, it should be possible to get the full corresponding source code.
We still have to check if it fetches, and to host all the source hosted by upstream.

Denis.

#3 - 01/17/2015 03:19 PM - Paul Kocialkowski

- Target version changed from 21 to Any version

#4 - 12/11/2015 03:19 PM - Denis 'GNUtoo' Carikli

- Device Not device specific added

#5 - 03/07/2021 05:20 PM - Denis 'GNUtoo' Carikli

- Resolution set to duplicate

We moved that in bug [#2224](#)

#6 - 03/07/2021 05:23 PM - Denis 'GNUtoo' Carikli

- Status changed from New to Closed
