Description			
<p>Hi, I've just seen that several device wiki pages have dead links for source code (http://redmine.replicant.us/projects/replicant/wiki/ReplicantSources instead of http://redmine.replicant.us/projects/replicant/wiki/ReplicantSourceCode) :</p> <ul style="list-style-type: none">- Galaxy Note (N7000) Build (http://redmine.replicant.us/projects/replicant/wiki/GalaxyNoteN7000Build)- Galaxy Nexus (I9250) Build (http://redmine.replicant.us/projects/replicant/wiki/GalaxyNexusI9250Build)- Galaxy Tab 2 7.0 Build (P31xx) (http://redmine.replicant.us/projects/replicant/wiki/GalaxyTab270P31xxBuild)- Galaxy Tab 2 10.1 (P51xx) Build (http://redmine.replicant.us/projects/replicant/wiki/GalaxyTab270P31xxBuild)- Galaxy S 3 (I9300) Build (http://redmine.replicant.us/projects/replicant/wiki/GalaxyS3I9300Build)- Galaxy Note 2 (N7100) Build (http://redmine.replicant.us/projects/replicant/wiki/GalaxyNote2N7100Build)- GTA04 Build (http://redmine.replicant.us/projects/replicant/wiki/GTA04Build)- Nexus One Build (http://redmine.replicant.us/projects/replicant/wiki/NexusOneBuild) <p>Same for build links into Nexus One build page (http://redmine.replicant.us/projects/replicant/wiki/BuildDependencies instead of http://redmine.replicant.us/projects/replicant/wiki/NexusOneBuild).</p> <p>It seems to have changed yesterday or today.</p>
