Description

Numerous websites are offering services to unlock the device. It is necessary to [secure safe phone unlocking](#) to avoid any inconvenient result. In addition, some mobile phone can be unlocked for free; however, other needs the expertise of professional. Once the phone carrier gets locked, you can't use your phone on another network. However, the process of unlocking is easier than ever before. However, an unlocking phone isn't a catwalk where every person can handle it easily. When you stuck, it is better to pay and get the desired code. It's pretty simple, cost-effective and time-effective.

History

This is probably beyond the scope of the project, but feel free to create a post in the forums and collect some information there for now.

#2 - 04/16/2017 09:24 PM - Wolfgang Wiedmeyer

- Status changed from New to Rejected

- Resolution set to wontfix

There are already two forum threads where info about this can be added:

[Info on Unlocking Phones](#)

[SIM Network unlock PIN](#)

Support for unlocking support in [Samsung-RIL](#) should be tracked in a dedicated issue, although I don't know what the current status of this is. Paul knows this.
