Description			
Hi all,			
Is this phone https://www.pine64.org/pinephone/ a good candidate for Replicant?			
Many linux distros and ubports seems to be compatible with it. It seems to have a USB modem and many free drivers/firmwares

- Status changed from New to Rejected

The PinePhone Pine64 has not been deemed by the Replicant project to be a suitable device for us to port to yet, so it doesn't make sense for us to keep this Feature request open right now.

Discussion about this can continue in the forum here: <https://redmine.replicant.us/boards/27/topics/15275>
