Description

<https://github.com/vvviperrr/SimpleRT>

Issues: Some apps do not recognize the reverse tethered internet connection due to ConnectivityManager policy. Just leave WiFi or 3g connection active, connection will go through SimpleRT anyway.

Could a workaround be added to make apps believe that WiFi is on?

History

- Status changed from New to Closed

- Resolution set to invalid

I'm closing this ticket because it seems to be a bug in an app that we don't ship and there weren't enough details provided in order to reproduce the error.

It might be worth looking into this alternative reverse tethering app since SimpleRT hasn't been updated in a very long time:
