

Replicant - Issue #2044

Issue # 2025 (New): Enable to recreate the EFS partition completely from scratch

Find offsets for other data (modem revision etc) and find where to get them from

06/08/2020 08:05 PM - Denis 'GNUtoo' Carikli

Status:	New	Start date:	06/08/2020
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Telephony and mobile data	Estimated time:	0.00 hour
Target version:	Replicant 6.0	Spent time:	0.00 hour
Resolution:		Grant:	
Device:	Unknown	Type of work:	Reverse engineering (no code nor documentation available), Unknown
Description			

History

#1 - 03/27/2021 03:46 PM - _I3^ RELATIVISM

- Related to Issue #2037: Finish merging the GRUB patches upstream added

#2 - 03/27/2021 03:47 PM - _I3^ RELATIVISM

- Related to deleted (Issue #2037: Finish merging the GRUB patches upstream)

#3 - 03/27/2021 03:54 PM - _I3^ RELATIVISM

- Type of work Reverse engineering (no code nor documentation available), Unknown added

#4 - 03/27/2021 03:56 PM - _I3^ RELATIVISM

- Type of work Communication (mails, contacting people, etc) added

#5 - 03/27/2021 04:09 PM - _I3^ RELATIVISM

- Type of work Bug tracker editions added

- Type of work deleted (Communication (mails, contacting people, etc))

#6 - 03/29/2021 03:38 PM - Denis 'GNUtoo' Carikli

- Type of work deleted (Bug tracker editions)

#7 - 03/29/2021 03:40 PM - Denis 'GNUtoo' Carikli

There are probably several ways to find that information:

- By finding it online (XDA, other websites)
- By finding it in the nv_data.bin data (probably less time consuming) and reconstructing the field length, location, etc.

Note that the field might also be at different offsets depending on the devices. In that case we probably need other heuristic to find them.
