Description			

History

#1 - 07/11/2020 10:39 PM - Denis 'GNUtoo' Carikli

- Subject changed from Document N7100 JTAG to Document Galaxy Note II (GT-N7100) JTAG pads
- Device Galaxy Note 2 (N7100) added
- Device deleted (Unknown)

According to belgin, The Galaxy Note II (GT-N7100) and the picture from the link, some people already found the JTAG pads for the GT-N7100. However the picture is too blurry to identify the pads precisely.

```
04:37 < belgin> hello
04:38 < belgin> GNUtoo, i have noticed the note 2 (n7100) has some pads exposed
04:38 < belgin> apparently they're jtag and some people use them to flash the emmc externally
04:38 < belgin> do you think it's possible to debug the cpu with them?
04:41 < belgin> oh i see the n7000 has them exposed, you have to solder some stuff to the n7100 but they're th
ere

```

TODO:

- Take a small part of the picture that has enough information prove the claim above, and add the usual legal disclaimers for that.
- Find more infos on the JTAG pads if possible
