Description			
I want know if you can set support to the tablet mitsui 7105sr, the what have procesor imapx210 (arm11), 512 ram, 1 camera of 3.0 mp, 1 usb port, 1 usb otg port, 4 gb of storage, and i can't find a rom enabled for this device, or information available for i can recover the functionality this tablet. All information available on internet is bad, or is possible that i don't know search. :P			

History

#1 - 10/14/2012 09:24 AM - Paul Kocialkowski

- Status changed from New to Rejected
- Resolution changed from fixed to wontfix

Since none of the developers have the device, we are unlikely to start a port on it.
You're welcome to start such a port by yourself, but I will be hard if the device isn't already supported by CyanogenMod.

#2 - 01/17/2015 03:20 PM - Paul Kocialkowski

- Tracker changed from Support to Issue
- Target version changed from 21 to Any version
