Description

After I flashed my Galaxy S my sim card isn't recognized. I can't insert the unlock pincode or connect to any network. The simcard is fine I tested it in another phone.

History

#1 - 10/21/2012 11:01 AM - Paul Kocialkowski

Mhh sounds like the RIL isn't started. Could you paste some radio logs here?

Soem help about getting logs there: <http://redmine.replicant.us/projects/replicant/wiki/GettingLogs>

#2 - 10/21/2012 11:02 AM - Paul Kocialkowski

- Category set to 69

- Status changed from New to In Progress

- Assignee set to Paul Kocialkowski

- Target version set to Replicant 2.3

#3 - 11/13/2012 09:01 AM - Paul Kocialkowski

- Target version changed from Replicant 2.3 to 21

Seems to happen when RIL init fails. Maybe our aries code in libsamsung-ipc isn't strong enough (this happens more frequently with Galaxy S than any other device).

#4 - 11/18/2012 12:42 PM - Paul Kocialkowski

- Status changed from In Progress to Closed

- Resolution set to fixed

Ok, there was definitely something that could have been improved to make it more stable. This is fixed now:

<https://github.com/morphis/libsamsung-ipc/commit/617169fce836a9b31d6c629a4b16c886b311fb3f>

The fix will be in the next images release.

#5 - 11/22/2012 07:29 PM - Kasumi Ninja

Is this fixed in 4.0 0001? I just installed it and the simcard isn't recognized. Cyanogenmod doesn't recognize the sim card either.

#6 - 11/23/2012 07:53 PM - Paul Kocialkowski

If it doesn't work with CyanogenMod either, there must be something wrong with your phone, it is not related to the Replicant software implementation by any means.

Issue will remain closed.

#7 - 01/17/2015 03:18 PM - Paul Kocialkowski

- Target version changed from 21 to Any version

#8 - 01/02/2016 09:23 PM - Denis 'GNUtoo' Carikli

- Category changed from 69 to Telephony and mobile data

- Device Galaxy S (I9000) added
