#### Description

It seems that every key typed in the URL field on the browser is sent to Google (which returns search suggestions). We should check if it's also the case on the keyboard when suggestions are enabled.

#### History

##### #1 - 12/31/2012 07:29 PM - Paul Kocalkowski

- Status changed from New to Resolved
- Resolution set to fixed

Fixed with commit: [https://gitorious.org/replicant/packages\\_apps\\_browser/commit/1aadf381083662cdcb88beac531b5a8dd4e10b4a](https://gitorious.org/replicant/packages_apps_browser/commit/1aadf381083662cdcb88beac531b5a8dd4e10b4a)

There is now a settings in the privacy preferences to enable the search suggestions when typing in the URL field. It is disabled by default.

I also checked that the keyboard won't ask Google suggestions. As a matter of fact, it doesn't.

##### #2 - 02/08/2013 09:52 PM - Paul Kocalkowski

- Status changed from Resolved to Closed

Will be part of the Replicant 4.0 0002 images.

##### #3 - 01/17/2015 03:18 PM - Paul Kocalkowski

- Target version changed from 21 to Any version
