Galaxy Note II (SGH-i317M)	Not supported yet	Exynos 4412	Signed?	?	QMI	2G
Galaxy Note II 4G (GT-N7105)	None yet	Exynos 4412	Signed	Isolated (HSIC? USB?)	QMI	2G

TODO

- Finish populating the table of variants from: https://en.wikipedia.org/wiki/Samsung_Galaxy_Note_II#Table_of_variants
- Merge with [Exynos4412Devices](#) after migrating to mediawiki
- Look how similar the SGH-i317, SGH-i317M and SGH-T889 are, and add both versions to the same page if they are similar enough.
- When N7105, SGH-i317, SGH-i317M and the SGH-T889 are supported, look again how much the pages differs and merge them if they don't differ much.
